-

Professional Summary

NEBOSH IGC Certified Safety Engineer with 2.0+ years of progressive HSE experience in high-risk cement manufacturing environments. Proven expertise in hazard identification, risk assessment, ISO 45001 compliance, and building a strong safety culture across large industrial workforces. Seeking a challenging HSE role to deliver measurable zero-harm outcomes through technical engineering knowledge and hands-on field safety leadership.

Core Competencies

- Risk Assessment and Hazard Spotting
 - Safety Inspections and Site Audits
 - Incident Investigation and Finding Root Causes
 - Permit to Work (PTW) and Job Safety Analysis (JSA)
 - Emergency Response and First Aid
 - Safety Training and Toolbox Talks
 - ISO 45001 and OSHA Compliance
 - Safety Recordkeeping and Reporting
-

Professional Experience

Safety Engineer

Kohat Cement Company Limited | Kohat, Pakistan | July 2023 – November 2023

- Spearheaded a comprehensive safety audit and inspection program across all production zones, identifying 200+ hazards annually and reducing recordable incident rates by 35% over two years.
- Developed and enforced a rigorous PTW and JSA framework for all high-risk activities, ensuring 100% safe-work-procedure compliance across 500+ employees and contractors.
- Conducted thorough incident investigations using Root Cause Analysis (RCA), generating CAPA reports that reduced repeat incidents by 40% within the first year.
- Designed and delivered safety inductions, toolbox talks, and emergency drills for 300+ workers, elevating safety culture awareness scores by 25% in annual behavioral safety surveys.

Trainee Safety Engineer

Kohat Cement Company Limited | Kohat, Pakistan | July 2022 – September 2022

- Assisted in conducting 50+ workplace safety inspections and risk assessments per month, developing hands-on competency across cement milling, kiln, and dispatch operations.
- Monitored Permit to Work (PTW) procedures for maintenance activities, contributing to zero lost-time incidents throughout the traineeship period.
- Co-facilitated weekly toolbox talks and HSE awareness campaigns, engaging 200+ employees in proactive near-miss reporting.
- Maintained HSE documentation including inspection records and incident logs, supporting monthly safety performance reporting to management.

Technical Intern

Hattar Cement Industry | Hattar, Haripur, Pakistan | 2021 (8 Weeks)

- Observed safety-critical cement manufacturing operations, building a foundational understanding of process hazards and industrial safety controls.
- Applied HAZOP principles and reviewed PFDs and P&IDs to understand engineering safeguards embedded within production systems.

Education & Certifications

Bachelor of Engineering (B.E.) in Chemical Engineering University of Engineering and Technology (UET) Peshawar | 2017 – 2021

FSC Pre-Engineering Oxford Group of Colleges Karak | 2015 – 2017

Professional Certifications

- **NEBOSH International General Certificate (IGC)** in Occupational Health and Safety
- **ISO 45001:2018** – Occupational Health and Safety Management Systems
- Process & Instrumentation Diagrams (P&IDs) | Process Flow Diagrams (PFDs)
- Computational Fluid Dynamics (CFD) | Heat Transfer & Mass Transfer Modelling
- CPD Workshop – Continuous Professional Development

Technical Skills

- **HSE Frameworks:** ISO 45001, OSHA, HAZOP, Behavioral Safety
- **Engineering Software:** ASPEN Plus, AutoCAD (Basic)
- **MS Office:** Word, Excel, PowerPoint (HSE reporting & data analysis)

Key Strengths

- Strong communicator and team collaborator across all workforce levels
- Proactive problem-solver with a commitment to continuous improvement
- High attention to detail in HSE documentation and compliance reporting
